

MEASURING GUIDE

At Home magic we can help make your dream kitchen a reality. To do that we offer **one free kitchen design from our expert designers.**

To help us come up with the kitchen of your dreams all you need to do is provide us with the measurements of your kitchen and some ideas of what you'd like in your new kitchen.

We promise this will be easy! To help you with this process we've created this guide.

TIME TO MEASURE

STEP 1

YOUR KITCHEN SHAPE

Draw your kitchen as a box showing all the walls that you think will have cabinets. Be sure to include any major structural features or obstacles.

STEP 2

DRAW IT OUT

Mark any openings such as windows and doorways. Now, label all the openings in your kitchen. Be sure to show exact locations of doors, windows, hood vents, exhaust, gas lines, water line, drain line, outlets, switches, light fixtures, and heat vents. Be sure to include radiators or other obstacles that affect where cabinets can be installed.

STEP 3

MEASURE

Now it's time to get out the tape measure.

Measure all the openings, from outside edge to outside edge, and add them to your drawing.

If you're uncomfortable with precise measurements feel free to round to the nearest inch.

Make sure to **double check your measurements.**

STEP 4

DREAM IT

Most people already have a good idea of where the major items will go in their kitchen. Feel free to draw your ideas of what you would like and include the placement of your sink and appliances.

OPTIONAL

TAKE A PIC

What can really help your designer is to take 'before' pictures of your kitchen and send them along with your measurements.

That's it! You're done! It is that easy to measure your kitchen.
